

AIRUNIT GEMINI

Decentralised domestic ventilation with high heat recovery

» FUNCTIONALITY

The **AIRUNIT GEMINI** is the answer to continuously increasing demands on air quality and interior hygiene with an efficiency of up to 98% in heat recovery. Equipped with two energy-saving and noise-reduced fans in push-pull principle, the **AIRUNIT GEMINI** can be used as an independent single room solution, but also as an exhaust air unit in conformity with standards.

» FACTS

- ✓ Heat generation efficiency of up to 98 %
- ✓ Fully automatic operation through factory integrated humidity sensor
- ✓ Operation from 15.2 dB(A) – one of the quietest single room ventilation units
- ✓ One unit for rooms up to 25 m²
- ✓ Hybrid operation with AIRUNIT SOLUS through coordinated control concept
